

GARMIN GPSMAP-5212

Feeling a little lost? Well get back on track with Garmin's GPSMAP-5212. This little machine has a ton to offer. Using the latest touch-screen technology featured on a gigantic 12.1" XGA bright color LCD display, you can plot your course, find the fish you've been in search of or check what Mother Nature has in store for your latest trip. The GPSMAP-5212 is preloaded with Bluechart g2 maps of the United States coastline (including Alaska, Hawaii, and the Bahamas) as well as a worldwide base map, making effortless navigation a literal touch away. Additional Bluechart options and features are available by purchasing the Bluechart g2 Vision SD card, for a small up-charge.

Among all of the amazing features the GPSMAP-5212 has to offer, there are two we feel really stand out: The 3D mariner's or fisheye perspective maps, which allow for mapping above or below sea level, make it easy to chart uncharted territory or illustrate when you're sitting on the mother load. And the Auto Guidance, which searches through relevant charts to create a route you can actually follow, because it's one that avoids such obstructions as shallow water and navigational markers—obstacles that surprise even the most seasoned captain from time to time.

Although worth every penny of its \$3,499.99 list price, for a limited time through our great friends at Bethel Marine Electronics, this awesome machine can be yours for only \$2,809.00! All you have to do is tell them you saw it in GAFF!

INDUSTRIAL REVOLUTION'S STORMPROOF MATCH KIT

No use crying over a little spilled water?

That's the case with Industrial Revolution's new stormproof matches!

Not only will they still light if they get a little wet, but these "super matches" will remain lit even if fully submerged in water. I know what you're thinking, but that last statement was neither a typo nor a lie. We here at GAFF were as intrigued by this product claim as any before, so we just had to see for ourselves. We contacted the good folks at Industrial Revolution and asked for a sample of their matches to see if we could put them to the test, and possibly give them the title of GAFF APPROVED. When the matches arrived, the GAFF team assembled as I struck a match and let it burn for a second or two. Then, without hesitation, I plunged it into a full glass of water, keeping it submerged for several seconds. I think we all half expected it to be fully extinguished when I removed it, but sure as the sun rises each morning, the match was still lit. Not only was it lit, but it remained blazing for an additional five to eight seconds! "GAFF APPROVED!" we all exclaimed with a slight laugh.

At \$3.99 for a 15-match single pack or \$5.99 for a 30-match double pack (less than a fast-food meal), I recommend buying a few for yourself and anyone else you know who shares your love and enthusiasm for the great outdoors.
