UTILITY & COMFORT IN THE OUTDOORS, SINCE 1971

WWW.UCOGEAR.COM
That’s the year our Original Candle Lantern came to market. A go-to camping essential still made to the original specs. Many years and lanterns later, we’re raising expectations for outdoor lighting.

We put 45 years of experience to work engineering a new standard in outdoor lighting. The result? Trailblazing, versatile overhead lanterns that are easy to pack, simple to place, and cast a wide, adjustable dome of light where you want it.

Why elevate the light? It was only natural. For 200,000 years, humans have navigated by the light of the sun, moon and stars. With the advent of artificial light, we positioned our indoor lighting above our heads. Why? It was only natural. Activities, obstacles and changes in terrain are better comprehended by our brains when light is from above – it’s just the way we are hard wired. This is why we invented the Sitka Lift Lantern System™. Light from above means a safer, more comfortable way to illuminate your environment when camping at night. It’s time to ditch those ground level camping lanterns that cause eye strain and disorientation. Experience light from above – it’s the natural way to see.

Pack the innovative UCO Lantern + Flashlight when you need a versatile, lightweight, compact source of light to illuminate your adventures. The convenient, patent-pending integrated shock cord in the base of the UCO Lantern + Flashlight enables you to hang and focus the lantern from both horizontal and vertical surfaces. No longer limited to a pole or limb that will accept a hook or string, the Alki Lantern + Flashlight can be lashed to a tree limb, tent pole, guy line, bar, strap or flagpole! Push the globe down to transform the lantern into a handy flashlight for reading in bed or to accompany you on late-night forays out of your tent. Offers four lighting modes, including a strobe mode.

Whether we were on a late-night trek in the foothills of Mt. Rainier, a midnight ocean voyage up the Pacific coastline, or just walking our dog in our Seattle neighborhood, every headlamp had the same problem. The elastic straps and hard plastic parts press into the head, slide down over the eyes and go from uncomfortable to painful the longer you wear them. We set out to change that – and we did. With a fresh approach and a new application of some proven technologies, we created the first headlamp that doesn’t hurt. Introducing the Vapor & Air precision fit headlamps. It’s not just comfortable, it’s headache free.
