Ecological, economic and social sustainability are guiding principles for our production. We are working to minimize our environmental impact, to make more efficient use of energy and materials, and to create a good working environment. Our management system conforms to the Quality Management System Standard: ISO 9001:2008 and ISO14001:2004

## Morakniv® throughout history

Since the 17th century, knives made in Mora, Sweden have been used by people all over the world. The Mora knife has become one of the most famous symbols of Sweden and over the years it has evolved from a simple everyday concept to the established brand Morakniv®. Our knives are produced in Mora which gives us total control over the manufacturing process. A Morakniv® is designed to stay extremely sharp. The steel of the blade is heat treated in a secret process which ensures that every knife has a blend of qualities (sharpness, strength, flexibility etc.) which is tailored to suit its purpose.

## Your Morakniv warranty lasts a lifetime

A knife from Morakniv is a robust tool that is meant to last. Morakniv guarantees any knife that we sell to be free from defect in material, construction or workmanship for the life of the product under normal use and following the care instructions.

If the knife is defective due to materials or workmanship, we will repair it at no cost or replace it with a new knife of the same or an equivalent model.\*

Morakniv is proud and well known for our high quality. Our customers shall feel confident in buying a Morakniv and that it will last for a long time under tough conditions.

## Morakniv® Garberg Black Carbon

This blackened carbon full tang knife is designed to meet the long-time wishes from our most dedicated users, as well as the desires of knife lovers that haven't yet discovered the world of Morakniv.

The knife is developed to handle the most challenging tasks it may be exposed to. Our full tang model is the most robust knife we offer and has a genuine Morakniv design. We've used the highest quality and most rugged materials in every part of the knife—from the handle to the blade. As with all our knives, it's produced in our own factory in Mora, Sweden according to our SGM® (Steel Grade Mora) standard. The blade has a Scandi-grind profile that makes it easy to keep sharp and a ground spine compatible with a fire starter. The blade has a DLC coating: a dark, hard, scratch-resistant coating. It is very thin, only about 1.5µm. The coating helps protect the carbon steel from corrosion.

### Morakniv® Garberg Leather Sheath

The sheath is made from 3 mm thick premium quality black leather. It has a sturdy and generous cover that is easy to open and secures the knife in place. The back of the sheath features a belt loop made from the same premium leather as the rest of the sheath. This natural material is something that will look and feel better the more you use it. It simply gets better with time and is something you can enjoy for the rest of your life.

### Morakniv® Garberg Multi-Mount

The Morakniv Multi-Mount is a versatile mounting solution that takes your knife use to the next level. It allows the knife to be mounted virtually anywhere you want. It provides secure mounting as well as a fast and easy attachment. Place it on your snowmobile, canoe, or ATV - when the knife is placed in the holder it can take a bumpy ride on any vehicle. Attach and detach the knife from the mount in just a couple of seconds. It is compatible with the MOLLE standard mounting system. It has strategically placed screw holes and slots for different types of straps. The knife is kept safe in the mount with a velcro strap.

## Morakniv® Bushcraft Series

Morakniv is the official supplier to the Swedish army and special forces around the world. The knife blades are made of carefully selected high-quality steel. In some cases we use carbon steel, in others we choose stainless steel. Each knife is made with materials that will perform the best for its intended use. The steel is hardened and tempered through a secret process that increases the durability of the knife and reduces the risk of corrosion.
